

## **Update on Quotes and Plans for the Village Hub Bus Stop**

---

Cllr Julian Carpenter has been seeking three quotes from BANES approved contractors:

[https://www.bathnes.gov.uk/sites/default/files/contractor\\_list\\_may\\_2021.pdf](https://www.bathnes.gov.uk/sites/default/files/contractor_list_may_2021.pdf))

Request have been sent for quotes to 4 local contractors. There's only been one response so far (See below).

Another set of contractors are being contacted.

The PC may have to review its requirements to only use the BANES list of approved contractors.

Freshford Parish Council

Cllr Jean Hawker has received the following response from George Bottin, Principal Engineer at BANES, about whether there's a way in which hoggin, rather than tarmac, can be used by the proposed new bus stop.

George will now speak with colleagues to see if there is a system whereby we can take over the maintenance of the small piece of land.

He will also look into how any hoggin can be bound. Should agreement be found we would obviously have to take on any liability regarding any accidents on the land.

I assured him that we had liability cover.
