

B&NES Consultation: Journey to Net Zero

February 2022

Email from B&NES:

Bath and North East Somerset Council are now consulting on the 'Journey to Net Zero' transport plan. The plan identifies the transport measures that we are proposing for travel into, out of and around Bath in the short, medium and long term up to 2030.

As part of this consultation we are keen to engage with all of the Parish Councils in our district and want to ensure we give you adequate opportunity to respond. Following recent requests we're writing to let you know that we are extending the deadline by 2 weeks to **21st February** for Parish Councils only to respond. Please send any comments and feedback on the plan before this date to this email address and we shall ensure it is included and taken into account alongside the other feedback received.

For further information please find below a link to the online consultation for the Journey to Net Zero which includes an online questionnaire as well as a link to an opportunity to join us for a public webinar on 24th January at 6pm where you can learn more about the plan and ask any questions you may have.
